1. Location aided broadcast in wireless ad hoc networks

Min-Te Sun; Wuchi Feng; Ten-Hwang Lai

[Global Telecommunications Conference, 2001. GLOBECOM '01. IEEE](#)

Volume: 5 2001

Page(s): 2842-2846 vol.5

Digital Object Identifier 10.1109/GLOCOM.2001.965948

Summary: Building efficient ad hoc networks for wireless communications is challenging due to the dynamic nature of the hosts. Broadcast service in ad hoc networks is critical in supporting applications and protocols. However, excessive redundant retransmissions are required.[AbstractPlus](#) | Full Text: [PDF](#) IEEE CNF**2. Enhancing the radio link protocol for VoIP session establishment signalling over**

Page(s): 2787- 2791 Vol.5

Digital Object Identifier 10.1109/VETECS.2004.1391429

Summary: Session initiation protocol (SIP) is an application layer signalling protocol used in a UMTS network for establishing multimedia sessions. With a satellite component in UMTS, there is a need to support an integral role in UMTS, there is a need to support[AbstractPlus](#) | Full Text: [PDF](#) IEEE CNF**3. Digital Object Identifier 10.1109/ICPADS.2005.228

Summary: Broadcasting has many important uses and several mobile ad hoc network protocols assume the availability of an underlying broadcast service. Applications, which require broadcasting, include LAN emulation, paging a particular node. How[AbstractPlus](#) | Full Text: [PDF](#) IEEE CNF**4. Digital Object Identifier 10.1109/TMM.2006.886282

Summary: Time-constrained error recovery is an integral component of reliable low-delay video applications. Regardless of the error-control method adopted by the application, unacknowledged missing packets must be quickly identified as lost or delayed, so[AbstractPlus](#) | [References](#) | Full Text: [PDF](#) IEEE JNLView: 1-4 | [View Search Results](#)

 Lee, T.-H.
Electronics Letters
 Volume: 26 Issue: 20 27 Sep 1990
 Page(s): 1686-1687
Summary: A class of relatively simple continuous ARQ schemes with repeated transn for multdestination communications under high error rate conditions is studied. In real throughput performance can be optimised by choosing th.....

 Fantacci, R.
Communications, Speech and Vision, IEE Proceedings I
 Volume: 137 Issue: 5 Oct 1990
 Page(s): 302-308
Summary: The paper deals with some efficient automatic-repeated-request (ARQ) scl control in digital communication systems. The proposed ARQ techniques utilise the rei information owing to repeated transmission of a same block to perform a.....

 Digital Object Identifier 10.1109/18.904499
Summary: We introduce and solve some new problems of efficient reconstruction of a sequence from its versions distorted by errors of a certain type. These erroneous versi considered as outputs of repeated transmissions over a channel, either a.....
